Subject: KMCO

- Harris County Fire Marshall's Office (FMO) appears to be complete with fire investigation and will be turning the facility over for cleanup operations;
- FMO has requested EPA to do one additional night of community air monitoring in addition to the KMCO contractor air monitoring until operations transfer to cleanup activities;
- EPA and KMCO Contractor (CTEH) continue community air monitoring activities on a 24 hour basis. Both contractors detected minimal concentrations of VOCs (0.1 ppm) in front of the facility which was due to the removal of the foam blanket for FMO investigative activities. No readings were detected in other off-site areas;
- KMCO is working with Cleanup contractors to plan and begin cleanup on the facility;
- KMCO will maintain contracted. Fire fighting company on-site for at least the initial stages of product cleanup;
- KMCO continues to remove firefighting water runoff water along drainage ditch (West of the intersection of Crosby Dayton Rd / Ramsey Rd - North side of Crosby Dayton) - Rainfall to be moving in on Saturday;
